

Cyclone Yasi

Lorraine Durham – Homeowner Cardwell QLD

“We had a window fabricator in Darwin recommend we install Breezway dual control 152mm Altair™ Galleries into our home a few years ago. I am happy we did because they didn't leak at all during cyclone Yasi. Our whole house has louvres installed and I would not have used anything else but Breezway, especially now after the experience of Cyclone Yasi which was a category five cyclone. I would highly recommend the product to anyone else and if I had to replace any doors or windows in the future I would certainly use Breezway again. I am very happy with the Altair™ Louvres due to their cross ventilation.”
